

# BaaS for Hybrid Cloud data protection

Hybrid Cloud  
Data Protection

## No-compromise solutions for optimal data back and recovery

As companies modernize their IT strategies, we know that every journey to the cloud is unique. Companies need flexible, powerful and ultimately secure data protection to meet them where they are today, and help them reach where they want to go tomorrow. With broad support of workloads from on-premises to cloud native and containers, and unique storage flexibility, Metallic BaaS helps you innovate with the peace of mind. Safeguard your data while combatting data silos, making the most of your IT resources, and guarding against the growing threat of ransomware and cyberattack.

### How we are different

- ✓ Award-winning cloud-based data backup from trusted leaders, Commvault + Microsoft Azure
- ✓ Reduced management overhead, up in minutes
- ✓ Future-proof scalability, from 1TB to 1,000+
- ✓ Unique SaaS Plus storage flexibility for performance and value
- ✓ Enterprise-grade data protection at hyper-speed
- ✓ Flexible, subscription-based pricing with no capex investment
- ✓ Ultimate, layered security for ransomware protection

Metallic has designed three critical solutions for hybrid cloud environments, for flexible adoption of BaaS data protection, tailored to your needs.

#### Metallic VM & Kubernetes Backup

A single enterprise-level solution to protect your workloads in VMs or containers—without the complexity or siloed approach.

- Streamlined setup
- High scalability
- Easy one-stop management

#### Metallic Database Backup

A simple, flexible solution that minimizes the risk of data loss and regularly preserving changes for business-critical structured data of SQL databases and SAP HANA environments.

- Empower database admin
- Reduce risk and increase value
- Speedy recovery

#### Metallic File & Object Backup

Single-solution protection for File & Object data that provides seamless backup and swift recovery of servers, files, or objects - across the whole system.

- Total coverage
- Cost-efficient solution
- Optimized storage
