

# Data protection for the Sales, Service and Financial Clouds

Metallic Backup, from Commvault, delivers powerful, enterprise-grade data protection. With broad-ranging coverage across production and sandbox environments, Metallic keeps valuable Salesforce data safe and recoverable from deletion, corruption, and ransomware attack – with the simplicity of SaaS.

## Protect for your Salesforce investment

- ✓ Safeguard production and sandbox environments
- ✓ Rapidly recover from deletion or attack
- ✓ Leverage advanced, hardened security controls

### Complete Protection

Robust protection for valuable Salesforce data, including content, files, custom objects, profiles, metadata, hierarchical relationships, and more. Effortlessly backup and restore data at scale, without the cumbersome exports and lengthy refresh windows.

- Comprehensive coverage of users, configurations, and settings
- Daily automated backups
- Granular search with full fidelity restore options
- Flexible point-in-time, in-place, and out-of-place recovery controls
- Deduplication and compression for rapid recovery

### Award-winning SaaS

With Metallic™ Salesforce Backup, you get proven data protection, without the hassle. Metallic means simple deployments, built-in maintenance, and automatic updates. SaaS that's proven to reduce costs and eliminate headaches - so you only pay for what you need.

- Unlimited cloud storage and unlimited retention included by default
- Bring your own AWS storage options
- No hardware, installation, or large upfront capital investments
- Zero egress fees or hidden storage charges
- Automatic updates and maintenance

### Multi-layered Security

Enterprise-grade protection to safeguard your Salesforce data. With stringent security standards, privacy protocols, and zero-trust access controls built-in, Metallic provides advanced controls combat today's data loss threats.

- Isolated, air-gapped backups from source data
- Layered security plus GDPR compliance
- At-rest and in-flight data encryption
- Role-based, SSO, SAML authentication controls
- SOC2 and ISO 27001 certified
