

Smart Data Protection with Metallic and Oracle Cloud Infrastructure

The right data management solution must help companies move fast, stay agile, and put security first as they modernize their business. Metallic® Data Management as a Service (DMaaS) offers Oracle customers an agile, SaaS-delivered solution to ensure data protection and recoverability, thwart ransomware and other cyberthreats, and drive data compliance as they move to cloud and adopt OCI.

Smart enterprise cloud management with Metallic and OCI.

- 
Smart modernization - Peace of mind that your data will be there when you need it, as you modernize your apps and accelerate your cloud journey.
- 
Smart security - safeguard your data leveraging OCI, with ransomware protection and security that's baked-in, never an afterthought.
- 
Smart savings - Leverage a SaaS-based solution to reduce your overall TCO with fast time-to-value, less infrastructure to manage, and simplified administration.

Expansive coverage with single pane of glass management

Address your unique multi-cloud and hybrid cloud use cases. Get coverage for enterprise databases and VMs, to containers, file systems, and SaaS app data - with NEW support for OCI VMs and Oracle Container Engine for Kubernetes (OKE).

Unique hybrid cloud flexibility

For fast recovery of cloud and on-premises workloads, manage data close to the source. Send your data backups to managed cloud storage - Metallic Recovery Reserve on OCI; bring your own Oracle Cloud Storage; or leverage on-premises storage including Commvault HyperScale™ X, for the fastest recovery of on-premises data.

Differentiated security for ransomware protection

Metallic Recovery Reserve™ on OCI for air-gapped protection and quick recovery; security insights and unique capabilities for early warning of attack; plus, the only FedRAMP High Ready DMaaS solution.

Data mobility

For your hybrid cloud strategy – put your backups in the cloud as your first step to cloud migration; backup and restore VMs to convert from on-premises to OCI.

SaaS simplicity

Cloud-based delivery means fast to implement and easy to manage - with reduced data center footprint, automatic updates and no big upfront expense—all from industry-leader Commvault.

Supported Platforms and Applications

Data Backup & Recovery

Metallic offering

- VM & Kubernetes Backup
- File & Object Backup
- Database Backup

OCI Cloud Storage

Metallic offering

- Metallic Recovery Reserve on OCI
- BYO Oracle Cloud Storage

Oracle workloads supported

- Oracle and Oracle RAC databases
- OCI VMs
- Oracle Container Engine for Kubernetes

Coming soon:

- DBCS
- Exadata DB
- OCI Object storage

Other workloads supported

- VMware
- Kubernetes (all CNCF-certified distributions)
- Hyper V, AWS
- Azure VM, VMC, Amazon EC2
- AWS S3
- Windows /Linux/ Unix File servers
- Azure Blob
- Azure Files

- Microsoft SQL Server
- Oracle & Oracle RAC
- SAP HANA
- AWS (DynamoDB, RDS, DocumentDB, Redshift)

On-premises Storage

- Commvault HyperScale™ X
- BYO on-premises storage
